

SPECIFICATION AMENDMENTS

Kindly amend the original filed specification as follows.

Please replace the paragraph/section beginning at page 1, line 10, with the following rewritten paragraph:

Banquet tables have become very popular since the tables are ~~eeconomy~~ economic, cheap and foldable that can be quickly and easily folded for carriage and storage and unfolded for use. Especially when some participant-intensive activities take place in multi-function rooms or designated areas, the banquet tables can be temporary set up in minutes. After the functions, the banquet tables can be quickly and neatly folded up for storage.

Please replace the paragraph/section beginning at page 1, line 16, with the following rewritten paragraph:

A conventional banquet table comprises a tabletop and a pair of table legs foldable mounted underneath the tabletop. For example, U.S. patent 5,957,061 generally suggests a banquet table that two table legs are pivotally mounted at two opposed side end portions of the tabletop. Since the two table legs support the tabletop at two side end portions thereof, when a downward loading force F is applied on the tabletop, a mid-portion of the tabletop may be cracked easily. In order to enhance the rigid structure of the banquet table, the tabletop must be made of ~~stiffness~~ a stiff material such as wood or metal. However, the wooden or metal tabletop will increase the overall weight of the banquet table that reduces the portability of the banquet table.

Please replace the paragraph/section beginning at page 10, line 4, with the following rewritten paragraph:
